

Richmar's line of clinical modalities are designed to treat a diverse range of needs. From electrostimulation to therapeutic ultrasound and everything in between, Richmar's clinical line of modalities allow the patient to receive effective treatment for injury and recovery.

- Based on Clinical Studies & Educational Resources
- Premium models have clinical protocols & body specific settings
- Equipped with easy-to-use technology
- Cost effective

The TheraTouch line of clinical modalities offer a wide range of treatment options in one user-friendly, ergonomic design. Equipped with a bilingual menu-driven touchscreen interface, the TheraTouch EX4, CX4, CX2, UX2, LX2, and DX2 modalities guide clinicians step-by-step through treatment protocols to ensure the ideal therapeutic treatment – including electrode placement for better treatment outcomes. All units come equipped with a 3 Year Warranty.

EX4, CX2, CX4 all include:

- Waveforms Available:
 - Interferential
 - Premodulated
 - Biphasic
 - Symmetrical
 - Asymmetrical
 - **RAAS**
- NMS
- Russian
- High Volt
- Microcurrent

Rapid Agonist Antagonist Sequencing (RAAS)

is a unique stimulation waveform that replicates the typical firing pattern of normal muscle contractions, used to effectively re-educate weak and inhibited muscles following surgery, injury, or trauma

TheraTouch®
EX4 DQ7200

**Advanced Four - Channel
Electrotherapy**

TheraTouch®
CX2 DQ8222

**Advanced Two - Channel
Combination Therapy**

TheraTouch®
CX4 DQ8200

**Advanced Four - Channel
Combination Therapy**

A The **TheraTouch UX2** is a dual headed ultrasound device, equipped with a 1cm and 5cm applicator, and a dual holstered design to accommodate. Quick start a treatment in just a few simple steps and easily select and adjust the parameters. The Favorites feature allows storage of up to 99 customer programs for future use. This ultrasound device operates in 1 and 3 MHz frequencies and offers pulsed and continuous modes. The amplitude can also be toggled between W and W/cm².

B The **TheraTouch® LX2** is a Class IIIb “cold laser” therapy device, capable of delivering up to 35 joules/cm² per treatment. The TheraTouch LX2 is the perfect product addition to offer tissue healing, in addition to reducing inflammation and pain. Selectable clinical protocols simplify setup of laser therapy treatments, making the LX2 a great entry into laser therapy; while the ability to adjust treatment parameters provides customizations for the laser therapy specialist.

C **TheraTouch DX2** introduces several new advancements in safety, convenience, and efficiency compared to other shortwave diathermy devices.

SCIENTIFIC DOSAGE CONTROL

Scientific Dosage Control (SDC) allows for two additional dosimetry settings within Dose III to provide more options for therapeutic heating within patient comfort tolerances.

DOSE I - Subthermal
DOSE II - Mild Heat
DOSE III - Low Heat

DOSE III SDC M - Moderate Heat
DOSE III SDC H - High Heat
DOSE IV - Vigorous Heat

D **THERADOT Deep Oscillation Therapy** is a unique therapeutic treatment for rehab that is FDA-Cleared for muscle relaxation, increasing circulation, and pain relief, which are important factors in restoring function and maintaining muscle mobility. Deep oscillation therapy is felt as a gentle vibration within the tissues, which relaxes the underlying muscles, making soft tissues more pliable for manipulations aimed at increasing range of motion.

Quattro 2.5 DQ8450 **Professional Electrotherapy Device**

The microprocessor controlled Quattro 2.5 is a professional four-channel electrotherapy device that provides IFC and Premodulated, Russian, EMS and TENS waveforms with two separate timers.

SoundCare Plus DQ9275 **Professional Ultrasound Device**

The SoundCare Plus comes equipped with two applicators, 1cm² and 5cm², that are plugged into the device allowing the user to switch between applicators with a single button push. The SoundCare Plus has 20 presets and operates in 1 MHz and 3 MHz frequencies. The portable design lets you take it to your patient or keep it at the clinic.

ComboCare DQ7844 **Professional Combination Therapy Machine**

The ComboCare is a professional two-channel device that combines clinical ultrasound therapy with five electrotherapy treatment waveforms: IFC, Premod, Russian, EMS and TENS waveform. Its advanced operating system ensures a complete range of therapy.
