

BALANCE - STRENGTH - VERTICAL JUMP

Kinvent K-Deltas

Portable Force Plates

Wireless dual force plates that turn balance, isometric strength and vertical jump assessments into objective, repeatable data - visualized instantly through the Kinvent App.

Available through GM Therapy - serving clinics across Texas, Oklahoma and New Mexico

Objective data for recovery & performance

The K-Deltas pair two portable force plates with the Kinvent App to deliver lab-grade biomechanical data in any setting. A single setup supports clinical assessment, return-to-sport testing and performance tracking without a dedicated lab space.

01 / BALANCE

Postural Control

Double- and single-leg balance, center of pressure, sway velocity, load distribution and landing stability after dynamic tasks.

02 / STRENGTH

Isometric Assessment

IMTP, ASH Test and McCall protocols quantify maximal force, Limb Symmetry Index (LSI) and relative strength vs body weight.

03 / POWER

Vertical Jump & F-V Profile

CMJ, squat jump and drop jump capture jump height, peak power, RSI, force-velocity profile and Dynamic Strength Index.

04 / WORKFLOW

Real-time Biofeedback

Instant on-screen visualization through the Kinvent App on iOS or Android - share results, track progress and export reports.

Connected to the Kinvent App on iOS & Android

Why choose K-Deltas

- Functional + performance in one tool**
Balance, strength and jump testing.
- Large surface**
Supports double- and single-leg protocols.
- Portable, wireless**
Set up anywhere in under a minute.
- Reliable metrics**
Repeatable objective data for documentation.
- Kinvent ecosystem**
Pairs with K-Push, K-Pull, K-Power, K-Myo and K-Move.

Ready to bring objective force-plate data to your clinic?

Request a quote, demo or pricing through GM Therapy - your regional partner for Kinvent in TX, OK and NM.
