

K-POWER

SPEED SENSOR

Every millisecond counts

TAKE YOUR ATHLETES TO THE NEXT LEVEL WITH K-POWER!

The first hybrid **sprint and Velocity-Based Training (VBT) sensor**, delivering real-time, high-precision data on distance, speed, explosiveness, and power.

MEASURE MOVE PROGRESS

PRODUCT SPECIFICATIONS

DIMENSIONS

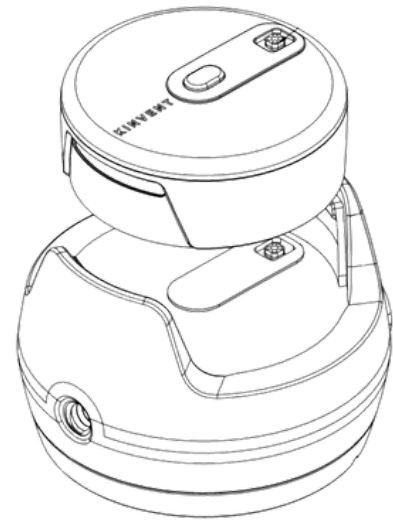

- **Dock:** Diameter 64 x 43mm - **Sensors:** Diameter 49 x 20mm

WEIGHT

- **Dock:** 120g - **Tracker :** 30g

WIRELESS RANGE

- Up to 30m
- **Max Accelerations:** +-16g
- **Static Accuracy:** 2°
- **Dynamic accuracy:** (head., pitch, roll) 7°, 2°, 2°
- **Acquisition frequency:** 200 Hz
- **Eco features** - Self-activated "sleep" mode after 10 minutes.
- **UWB frequency:** 100Hz - UWB static accuracy <10 cm
- **Accuracy:** ±2 % (speed) | ±5 % (power)
- **Battery Life:** > 10 hours

Part number: [MP.21.02.FN] K Power

EAN number: 3770033274477

EQUIPMENT INCLUDED IN THE PACK

Accessories:

1. Small strap 32 cm: for bar (VBT) + holder
2. S-M: Medium strap 80 cm: chest / waist + holder
3. L-XL: Large strap 120 cm: chest / waist + holder
4. Magnetic barbell accessory

K-Power:

5. 2 sensors
6. 1 dock

Part number: [ME.15.00.00]

EAN number: 3770033274576

ADDITIONAL TRIPOD (NOT INCLUDED IN THE PACK)

- **Material:** Carbon fiber
- **Max Height:** 220 cm
- **Folded Height:** 50 cm
- **Load Capacity:** 3 kg
- **Weight:** 0.6 kg
- **Center pole section:** 5
- **Center pole Diameter:** 25-22-19-16-13 mm
- **Top screw:** 1/4 + 3/8
- **Lock manager:** Twist lock

Part number: [ME.12.01.00]

EAN number: 3770033274569

PRODUCT BENEFITS

**01 Portable & Wireless Design**

Ready in seconds - No cables, no hassle . K-Power is ultra-light and fully wireless, giving athletes complete freedom of movement in any environment.

**02 Indoor & Outdoor Use**

Train anywhere
K-Power works seamlessly outdoors and indoors, even in limited spaces like gyms or sports halls.

**03 Hybrid Technology IMU + UWB**

Powered by UWB technology, K-Power offers ultra-precise tracking with minimal drift, delivering lab-level accuracy in real-world conditions.

**04 Versatile Applications**

From strength and conditioning to rehab and high-performance sport, K-Power adapts to a wide range of needs and disciplines.

**05 Real-Time Feedback**

Get instant data on speed, power, and explosiveness, helping coaches and athletes make smarter, faster training decisions on the spot.

**06 High Precision tracking**

Measures up to 10 m/s speed and 5000 W power, with 200 Hz sampling rate and $\pm 2\%$ accuracy.

COMPETITIVE ADVANTAGE

EXPERT ADVICE

"K-Power: where every milliseconds counts."

The Power of Time with K-Power

The K-Power sensor introduces a major breakthrough in biomechanics: real-time measurement of speed, RFD, and power—not just movement, but how fast and efficiently it happens.

Unlike traditional tools that only capture snapshots, K-Power delivers continuous, time-based data, giving coaches and therapists deeper insight into athletic performance and rehab progress.

With lab-level precision, wireless freedom, and integration with Cassandra AI, it's a powerful, field-ready tool for unlocking true potential."
